

EDEN'S CORNER

Printing Guide

Prompt cards • Affirmation cards • Movement cards

A short set of notes so the cards print cleanly. Product files have no crop marks and no cut lines. Print one card, one sheet, or the whole deck.

In these four pages

1. Title — what this guide is for
2. Which file — single 4×6 cards or 4-up Letter sheets
3. How to print — short-edge duplex and cutting
4. Quiet notes — paper, personal use, if a file will not open

Which file

Most card decks include two print files. Use the one that matches how you want to print.

Single cards

One 4 × 6 in card per page.

Use this for 4×6 paper, a photo lab, or one card at a time.

File name ends with _SingleCards.pdf

4-up duplex sheets

Four cards per US Letter page. Fronts and backs are interleaved.

Print double-sided. Flip on the short edge.

File name ends with PrintLayout-Duplex_Letter.pdf

This guide covers prompt decks, affirmation decks, and movement decks. All of them use the same 4 × 6 card size.

Do not scale to fit. Print at 100% / actual size.

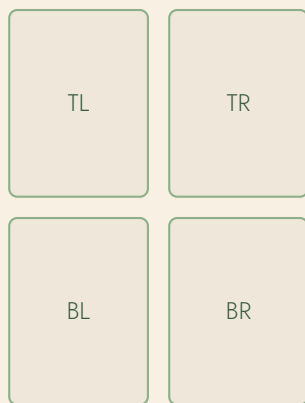

If your download only has one of these files, print that one. A missing layout is not a broken deck — some listings ship SingleCards first and add the duplex file later.

How to print

A short sequence for the 4-up Letter file. Stop after any sheet.

1. Open the Duplex Letter file (or SingleCards if you are printing one card at a time).
2. Set paper to US Letter for the 4-up file, or 4 × 6 for single cards.
3. Choose 100% / actual size. Turn off “fit to page.”
4. For duplex sheets: print on both sides and flip on the short edge.
5. If fronts and backs do not line up, the flip was set to long edge. Reprint that sheet on short edge.

How the 4-up sheet is arranged

Reading order: top left, top right,
bottom left, bottom right.
Backs are mirrored for a short-edge flip
so each back lands behind its front.
A partial last sheet only prints the
slots that have a front card.

Cutting

The 4-up block sits inside ordinary Letter margins. A paper cutter or scissors is enough. Rounding the corners is optional. You can leave cards uncut and use a sheet as a page.

Quiet notes

Ordinary printer paper is enough. Heavier card stock is a preference if you want a stiffer card. No particular printer, shop, or paper brand is required.

- Home printer or a local shop — both are fine.
- Color is designed for ordinary home ink. Light backgrounds keep pages calm and cheaper to print.
- You can print one card, one sheet, or the whole deck. Unused cards can stay in the file.
- These files are for personal use.
- If a download will not open, write to Eden's Corner and a fresh copy will be sent.

If something looks off

- Fronts and backs not lining up: the flip was set to long edge. Reprint on short edge.
- Cards look small on the page: that is the 4-up Letter file. Use SingleCards for full 4×6.
- A pale background that prints a little darker than the screen is normal for home ink.
